

模压成型用玻璃纤维产品

FIBERGLASS PRESSING PRODUCT

BMC成型工艺

由玻璃纤维或碳纤维、树脂、填料、固化剂和引发剂经混合、造粒、干燥而成。其颗粒为不规则或球状颗粒。

团状模塑料 BMC

BMC Process

Batch molding compounds made by combining glass fibers, resin, filler, catalyst and hardener.

Injection machine

树脂可固化

BMC 可固化

LFI工艺

将碳纤维切成一定长度并置于树脂和芳纶纤维毡表面，然后上模具与下模具合上反应固化，制成最终制品。

异氰酸酯
isocyanate

粗纱
Roving

When the resin is cured, the mold is removed, and the part is finished.

WIND
Mould

开槽成型用玻璃纤维产品
Tapered glass products for tape forming

喷射成型工艺
Spray forming process

干法成型工艺
Dry forming process

连续成型用玻璃纤维产品
Continuous forming glass fiber products

纤维成型工艺
Fiber forming process

离心浇铸成型工艺
Centrifugal Casting Process

模压成型用玻璃纤维产品
Compression molding glass fiber products

SMC成型工艺
SMC Process

热成型工艺
Thermforming process

层压工艺
LPR process

层压工艺
LPR process

连续成型用玻璃纤维产品
Continuous forming glass fiber products

拉挤成型工艺
Pulling forming process

连续成型用玻璃纤维产品
Continuous forming glass fiber products

抽丝工艺
Spinning process

挤出后处理
Extrusion after treatment
